

## LANDSCAPE GARDENING SERVICE

Brighstone Landscaping offers private and commercial landscaping service.

No request is considered too small as our work can range from repairing broken fences to major landscaping activity on new premises.

The Sainsburys store in Newport, Isle of Wight is an example of our competence in the design and execution of commercial services.

Our creative designs and imaginative solutions in overcoming landscaping problems are reflected in the capabilities of our highly trained and imaginative staff.

A recent landscaping challenge for example, involved importing trees from Italy and sourcing suppliers around Britain for the precise types of plants.

As well as constructing garden boundary walls and driveways, we have also completed projects for owners of exclusive manor houses. This specialist area includes the rejuvenation of gardens, restoration of period floral displays and the creation of croquet lawns.

We also specialise in the development of 'secret' walled gardens, woodland plantings and courtyards.

Our staff show great diligence in their work and this is borne out by the number of references and recommendations we receive for our work.
