

PORTCHESTER CREMATORIUM

Portchester Crematorium is situated on the lower slopes of Portsdown Hill between Fareham and Portsmouth.

In 2005 Brighstone Landscaping Limited was awarded the grounds maintenance for the Crematorium which includes the many horticultural features. For example, works covered within the contract specifications include:

- Rose gardens
- Seasonal bedding
- General shrub borders
- Heather borders
- Specimen trees
- A nature pond
- A large mill stone water feature - approximately 6 metres across
- A large composting area for all prunings, grass cuttings and cut flowers
- A conservatory for indoor plants
- All grass areas are regularly cylinder mowed, aerated, fertilised and weed killed

Comprising over 5 acres of gardens, Portchester Crematorium is the second largest in the country. Brighstone Landscaping Limited understands the importance of working with and for the public at often sensitive times in these conditions and have shown that we are fully committed to the nature of this work.
